TrustOS Platform

Device Integrity Blockchain Service

In relation to the device with ID *[Device001]* monitored by the TrustOS platform, **3** events were processed in the reference time interval. Detailed info for verifying the transactions can be found in the table below.

Devide data

Company: ACME

Model: Open source V2

Serial number: ASX26547

Reference time interval

Start: 20/4/2020 12:45:00

End: 20/4/2020 13:15:00

Transactions details

Transaction ID	Timestamp	Status
aeca2654b...677e762	20/4/2020 12:46:06	VERIFIED
7460b892f...35befed	20/4/2020 12:56:21	VERIFIED
c2d32b703...b2d6ce0	20/4/2020 13:06:53	TAMPERED

Therefore, the status of the device with date *20/4/2020 13:15:00* can be considered as TAMPERED.

REASON: *The value of the checksum code does not match the the expected value in at least one of the transactions processed in the interval. .*

You can check all transactions affecting this asset in the reference time range with this HASH code directly on the TrustOS platform: [0x8f7f6a729bdbf84ccc8c5691cb776678c6714e6d94320c6b5b0ea6639a9c29a2].
